

How do you assess and predict the global market for the onshore wind industry? (comparison of 2018 and 2020)

■ Very negative
 ■ Negative
 ■ Neutral
 ■ Positive
 ■ Very positive

n2018 = 648
 n2020 = 602

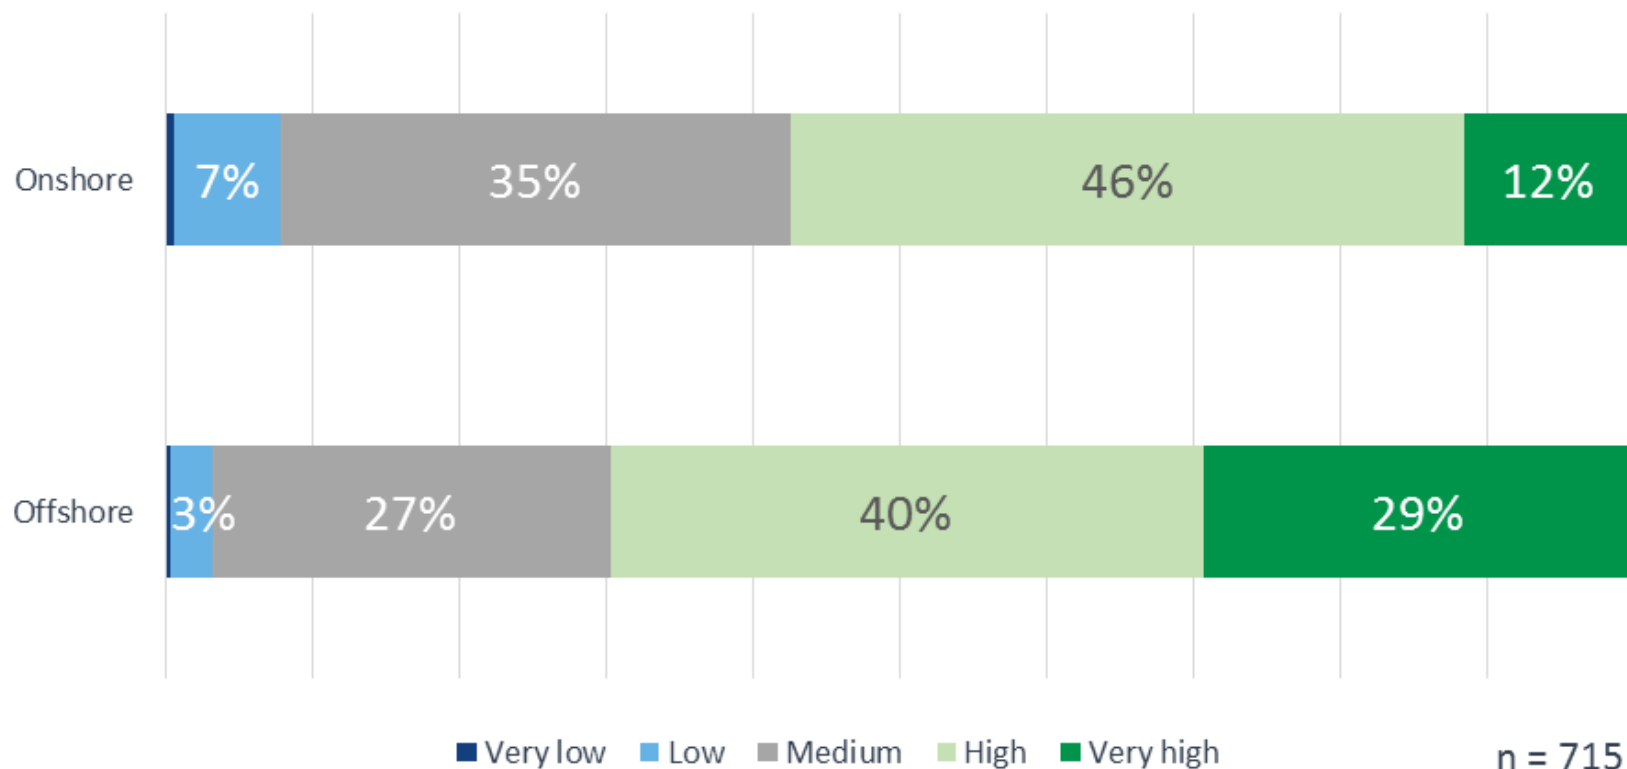

How do you assess and predict the global market for the offshore wind industry? (comparison of 2018 and 2020)

n2018 = 466

n2020 = 431

How do you assess further cost efficiency potentials through technology (e.g. bigger turbines, floating)

How do you assess further optimization potentials through digitalization (e.g. automation of wind farms, sector coupling, smart grids)?
