

THE GLOBALLY LEADING TRADE FAIR IN HAMBURG

The global rendezvous for the wind energy industry awaits you in Hamburg from **22 to 25 September 2020**: together, the world's biggest wind expo, WindEnergy Hamburg, and the WindEurope Conference, the globally leading expert congress, form the Global Wind Summit 2020 – in the same place and at the same time!

WindEnergy Hamburg reflects **the multifaceted dynamics of the wind industry along the entire value chain**. From planners, manufacturers, suppliers and financiers to operators and service providers – **onshore and offshore** – leading industry representatives, young, innovative entrepreneurs and giants of the sector meet here at the international marketplace of the wind industry. With great potential for innovation and genuine pioneering spirit. Be part of it!

The #1
globally leading trade
fair for wind energy.

EXHIBITORS

Top marks for new-customer acquisition, customer relations management, new business opportunities and trade fair atmosphere

Meeting point for
**international
politics.**

WE TELL IT HOW IT IS

Every year, the **WindEurope Conference** is a forum for dialogue and debate between the brightest and most influential voices in the wind industry. Renowned as the **flagship conference for the wind industry**, this is where conversations and connections happen between the various parts of the wind industry: **technology & finance, policy & academia, market leaders & start-ups.**

**In dialogue with
the future**

**Talks, workshops and
podium discussions**

Intensive interaction regarding
wind energy in Europe

**STORAGE SOLUTIONS
FOR RENEWABLE
ENERGIES**

More than 100 exhibitors are brought together in nine halls in the Storage Tour. Storage Insights demonstrates expertise and use cases in Hall B7, while the Storage Stage hosts elevator pitches on the best solutions.

**All about sector
interlinking**

How can network bottlenecks be avoided and the changeover to a climate-neutral energy supply be achieved? Experts will deliver exciting approaches to solving this at WindEnergy Hamburg 2020.
