

WindEnergy Hamburg: Event containers on the fair ground

Present your exhibition stand in the best light. In our outdoor exhibition area, your company's stand will attract instant attention, especially when an Event Container provides a perfect ambience for good conversations. The fully glazed front side bathes the interior space in light, creating a pleasant atmosphere for customers and partners while putting the spotlight on your products. Featuring a modern design, these event containers can be enhanced to suit your preferences by adding an advertising banner, a patio and/or a privacy fence. This makes an event container your perfect choice for an exhibition or presentation opportunity, conference room or VIP area. Make these benefits work for you – every design element you add can enhance your company's impact at the trade fair.
